	Release Date: April, 2009 Priority Status: When Subject Exist	Model(s) Affected: <b>All Wheel Aligners</b>
<b>Choosing the Proper Vehicle when Aligning an Volkswagen / Audi</b>		

**GENERAL OVERVIEW:**

In the recent months there have been questions about selecting the proper vehicle when aligning an Audi or Volkswagen. Vehicles manufactured under the VAG umbrella have a "Vehicle Data Sticker" affixed in both the spare tire area just under the carpet or it can be found in the service schedule usually found in the glove box. Using the information found in the alignment software and the vehicle data sticker the correct vehicle alignment specifications selection can be determined.

The figure shown is a sample of the "Vehicle Data Sticker". The user should obtain the information in the following order.

1. Vehicle Model Name.
2. Vehicle Model Code.
3. Vehicle Suspension Code.
