

1675

COMBINES SPEED, VERSATILITY AND SAFETY FOR INCREASED PRODUCTIVITY.

MONTY® 1675 SWING-ARM TIRE CHANGING SYSTEM

The Hofmann® 1675 tire changing system is ideal for handling passenger cars, light trucks and high-performance wheel/tire assemblies. Ergonomic design and safety-enhancing features provide the technician a safe workspace when changing a variety of tires. Locking mount/demount head offset provides maximum cosmetic safety for expensive wheels and significantly reduces the risk of harming wheel/tire assemblies.

ROBUST, PROFESSIONAL DESIGN

- Precision cast and machined shoes with robust cast jaws make for precise, slop free clamping
- Heavy-duty pneumatic valves are simple to operate and offer intuitive functionality
- Powerful electric motor generates 1200Nm of torque to the table top to mount stiff, difficult tires

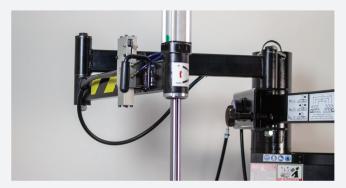

Ergonomic, Hand Operated Bead Breaker Control

Newly designed bead breaker is easy to use and prevents the technician from having to straddle the assembly during bead breaking

Mount/Demount Head

Locking of the mount/demount head offset, which provides maximum cosmetic safety for expensive wheels and significantly reduces the risk of harming wheel/tire assemblies

Swing-Arm Configuration

Quick and easy setup. Stays within a compact footprint, even with larger tire sizes. Provides an ergonomic tire changing position

Integrated Pressure Limiter

Stops air flow once pressure has reached 55 PSI (3.5 Bar) preventing accidental tire over-inflation

Tire Lifting Tool

Integrated bead pusher assists in the mount/demount process of the upper bead. Tire lifting tool aids the technician with the demounting process

Toolbox

Attached storage compartment allows easy access for tools and accessories

- Automatically minimizes damage to tires
